    Printing a Compliance Map..... 5

### Purpose

The purpose of the Public Regulatory application is for the public to create a compliance shape and identify associated features and special cautions within the compliance area necessary to complete fields in the Notification/Compliance document. Public customers will also be able to create a map to send to IDL with their Compliance.

### Intended Use

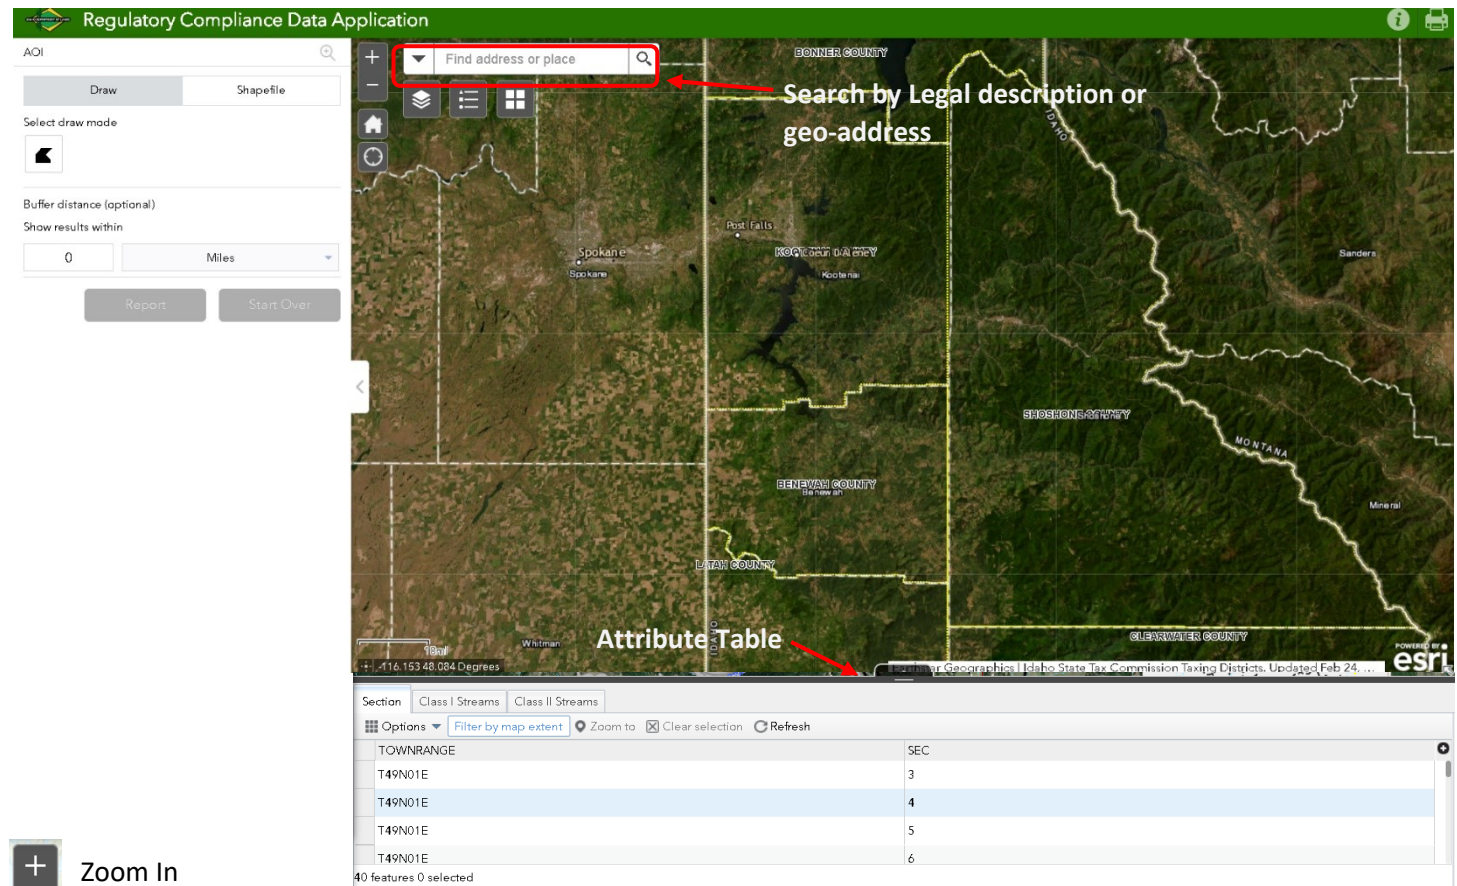

All customers who would like a compliance with IDL will be able to use the application to create a map and determine special conditions. Customers needing to complete a Notification/Compliance form will need to work with an IDL area office. This application will only be used to draw or upload potential compliance areas and determine special conditions on potential/proposed compliance areas.

## IDL Public Regulatory Compliance Application

Application Website:

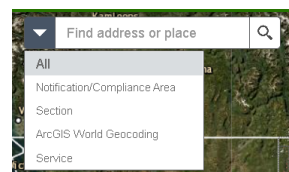

<https://gis1.idl.idaho.gov/portal/apps/webappviewer/index.html?id=c93d6eeda7e54a5db614aa91ca10f4e6>

- Zoom In
- Zoom Out
- Home Extent
- Change Basemap
- Layer List – turn off or on map layers
- Legend
- Print Map
- About Application

### Locate Compliance Area

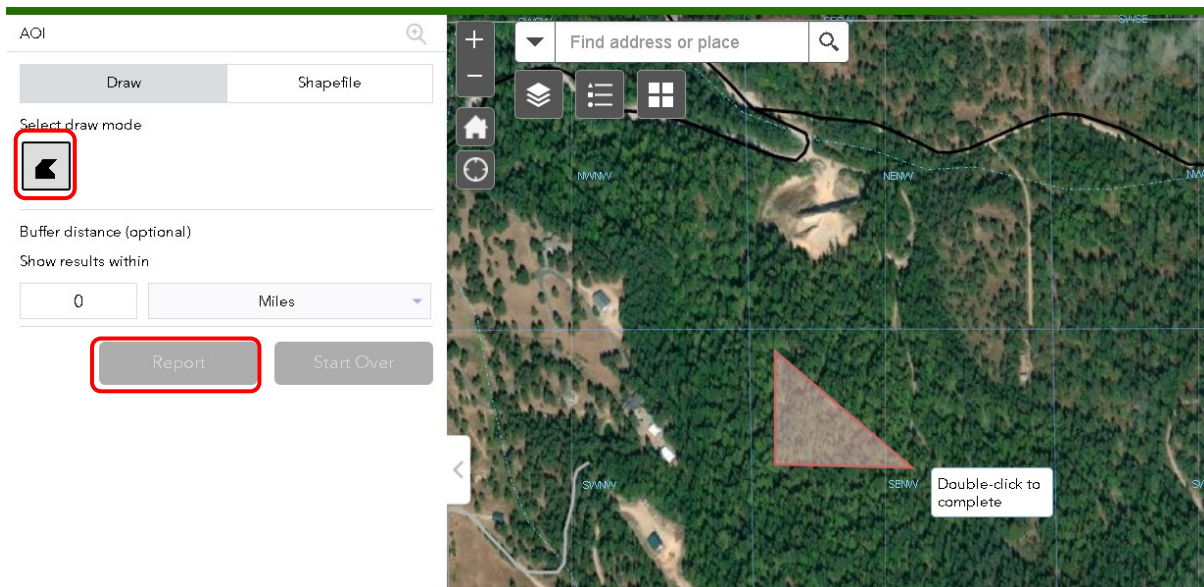

- Use the Search Widget to zoom to Area of Interest
- Using dropdown select the desired search feature
  - The Search bar will start to populate as you type
  - Legals should be typed – *T56N R02E, sec 01*
  - Locations can be any geographic feature
- Once you have narrowed down your location you can zoom to your search feature

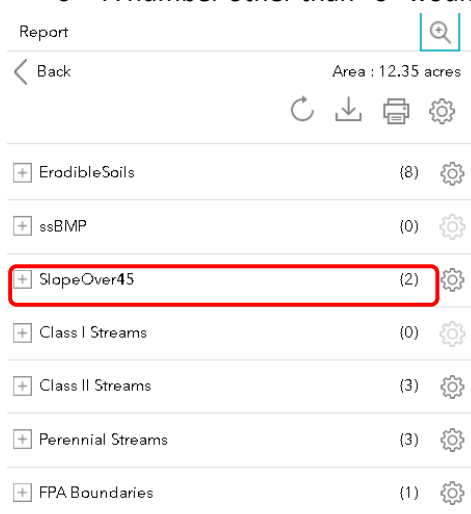

## IDL Public Regulatory Notification Application Guide

### Digitize Compliance Shape and Determine Site Specific Impacts

- Ensure the Area of Interest Widget is open
- Select Draw or Shapefile
  - Draw will allow you to draw a compliance area
  - Shapefile will allow you to upload a zipped shapefile
- Click on the Polygon button to begin drawing a shape on the accurate location on the map
- Click your mouse button to draw the shape
- Double Click to complete your shape

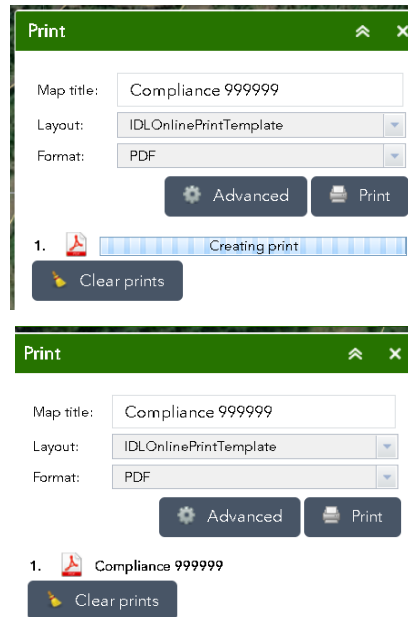

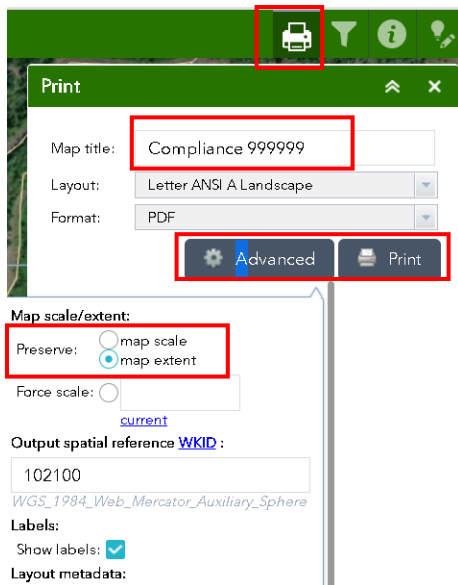

- Click Report to identify Site Specific Impacts
  - The Report function will be unavailable until you have completed your Compliance area
- Once the Reporting is complete a list of features will return with either a "0" or a number in the parentheses
  - A number other than "0" would indicate that the Compliance area is impacted by the specific feature.

- Use the Back Button to return to the Report main screen
  - You may also download the report results or print the results

## Printing a Compliance Map

- Open the Print Widget
- In the Map Title add the title you wish to give your map
- Open the Advanced options
  - Select Preserve Map Extent
- Click Print

- Open the Pdf and Print or Save the map to the appropriate location
